

MS Word Practical Assignment

Assignment Title

Formatting Practice – Microsoft Word

Objective

Create a **2–3 page document** on the topic “**Amazing Facts About the Human Body**” and use the document to demonstrate the MS Word formatting concepts learned today.

Instructions

Type the following content in Microsoft Word and apply the specified formatting wherever indicated.

Part 1: Title and Basic Formatting

Create the following title at the top of the document:

Amazing Facts About the Human Body

Apply:

- Font Type: **Arial**
- Font Size: **20 pt**
- **Bold**
- Center Alignment

Below the title, type:

Discover some fascinating facts about the human body and how its different organs and systems work together.

Format this paragraph using a different font type and size of your choice.

Part 2: Text Formatting Practice

Create the following sections.

1. The Human Brain

The **human brain** is one of the most complex organs in the body. It controls thinking, memory, movement, emotions, breathing, and many other important functions.

Format selected words in this section using:

- **Bold**
- *Italics*
- Underline
- Different underline styles
- Strikethrough

Try applying different formatting to different words rather than formatting the entire paragraph.

2. The Human Heart

The heart is a muscular organ that continuously pumps blood throughout the body. An average adult heart beats approximately **100,000 times a day**.

Format the following:

- Make **100,000 times a day** bold.
- Make *heart* italic.
- Underline the phrase **pumps blood**.
- Apply a different **underline style** to the heading.

Format Painter Practice

Format the heading **The Human Heart** in an attractive style.

Then use **Format Painter** to copy the same formatting to another section heading.

Do not manually apply the formatting again.

Part 3: Subscript and Superscript

Create a small section titled:

3. Important Scientific Notations

Type the following expressions:

Water: H₂O **Carbon Dioxide:** CO₂ **Oxygen:** O₂ **Area:** 25 m² **Energy:** E = mc²

Use **Subscript** for the numbers in the chemical formulas.

Use **Superscript** for:

- m²
- c²

Do not simply type the numbers in a smaller font. Use the actual **Subscript** and **Superscript** commands in MS Word.

Part 4: Change Case

Create the following text exactly as shown:

THE HUMAN BODY IS AN AMAZING MACHINE.

Use **Change Case** to convert it into:

The human body is an amazing machine.

Then convert the same sentence into:

THE HUMAN BODY IS AN AMAZING MACHINE.

Finally, convert it into:

the human body is an amazing machine.

Use the **Change Case** command instead of manually retyping the sentence.

Part 5: Formatting with Format Painter

Create a section titled:

4. Quick Facts

Type the following facts:

- The human body has 206 bones.
- The skin is the largest organ of the human body.
- The lungs help supply oxygen to the blood.
- The small intestine is several meters long.
- The human body contains a large amount of water.

Format the first fact with:

- Bold
- Italics
- Underline
- Appropriate font size

Then use **Format Painter** to apply the same formatting to at least **two other facts**.

Required Concepts

Your document must demonstrate **all** of the following:

Concept	Must Be Demonstrated
Format Painter	Yes
Font Type	Yes
Font Size	Yes
Bold	Yes
Italics	Yes
Underline	Yes
Multiple Underline Options	Yes
Strikethrough	Yes
Subscript	Yes
Superscript	Yes
Change Case	Yes

Final Challenge

At the end of the document, create a section titled:

5. Formatting Challenge

Write a short paragraph of **4–5 sentences** about the human body.

Apply at least **five different formatting techniques** from today's lesson.

For example:

- Change the font type and size.
- Bold important words.
- Italicize selected words.
- Underline a phrase.
- Apply strikethrough to an incorrect/old statement.
- Use superscript or subscript where appropriate.

Important: The formatting should improve the readability of the document rather than make it unnecessarily decorative.

Submission Checklist

Before submitting your document, verify that:

- ☐ Document contains 2–3 pages.

- ☐ All five sections are included.
- ☐ Different font types and sizes are used.
- ☐ Bold is used.
- ☐ Italics are used.
- ☐ Underline is used.
- ☐ Multiple underline styles are demonstrated.
- ☐ Strikethrough is demonstrated.
- ☐ Subscript is used for chemical formulas.
- ☐ Superscript is used for mathematical expressions.
- ☐ Change Case is demonstrated.
- ☐ Format Painter is used at least twice.
- ☐ Document is neatly formatted and readable.
